

Eaves Protector

EP15

A simple and effective product to prevent the exposure of the roofing underlay at the eaves, which leads to long term degradation of the underlay. The eaves protector, due to its rigid nature, prevents ponding behind the back of the fascia board.

- 1.5m lengths
- 10 x units per pack
- New build and re-roofing applications
- Material: PVC

Continuous Rafter Trays

RPV300 / RPV400 / RPV600

Continuous Rafter Trays are a simple but effective way of preventing loft insulation from being pushed up to the underside of the roofing underlay and will maintain a clear ventilation path into the roof void from the eaves. The rafter trays will be suitable for 10,000mm²/m or 25,000mm²/m continuous eaves ventilation.

- 300mm x 6m / 400mm x 6m / 600mm x 6m
- 10 x rolls per box
- New build and re-roofing applications
- Quick and easy to install.
- Roof pitches over 12.5°.
- Lightweight and durable.

Over Fascia Ventilator

OFV10/OFV25

Over Fascia Ventilators are an unobtrusive method of providing ventilation in a range of eaves details, including those without a projecting soffit.

- 10mm vent provides the equivalent of 10,000mm² per metre.
- 25mm vent provides the equivalent of 25,000mm² per metre.
