Home Water Kit

Tap water with *great taste*

Home Water Kit improves the taste, odour, filtration and concentration of sediments in your Drinking Water. With a simple Installation of the kit, you just add the cartridge that suits your needs.

2

Why tap water

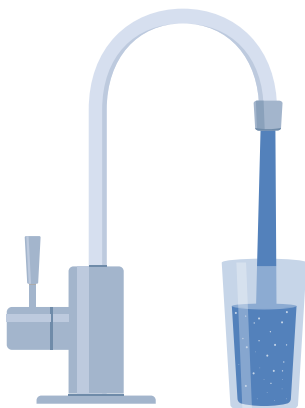

Drinking tap water is a very simple way to reduce your impact on the environment and take care of our planet. By installing 1 filter at home you are avoiding the need to purchase, and dispose of, thousands of plastic water bottles. (removing up to 10,000 plastic bottles) And by having refreshing Drinking Water flowing from your kitchen tap, you no longer have to lug around bottled water, or bulky recycling waste bags. And last but not least, tap water is good for your wallet!

Refreshing peace of mind and great taste

The Home Water Kit assures high-quality, refreshing and great tasting Drinking Water. The cartridge removes polluting elements, odours and off-tastes from your tap water, but preserves natural minerals. In this way, the filters turn your tap water into a natural source of Drinking Water.

Convenience

With a simple installation, you connect the filter to the existing water pipework so no additional faucet is needed. The kit requires limited maintenance, as the cartridge only needs to be replaced once a year. Enjoy 100% fresh and great tasting water, straight from your own tap.

Removes odours & off-tastes

The Home Water Kit removes unpleasant odours and off-tastes to turn your tap water into a natural source of Drinking Water. In addition, by using filtered water, you will enjoy the full flavor and aroma of coffee, tea and other drinks prepared using this water supply.

Eco-friendly

The Home Water kit is an ecological and convenient alternative to bottled water. By installing the filter at home, you help remove up to thousands of plastic bottles that are transported through our streets every day, which in turn reduces your carbon footprint.

Great performance

The attractive and elegant design of the Home Water Kit goes hand in hand with its great performance. When you install the filter, there is hardly any pressure loss, therefore the good flow rate of your tap water is maintained.

User-friendly

With our Home Water Kit you get fresh and clean Drinking Water straight from your tap. The kit is installed on your existing kitchen tap. Just replace the cartridge once a year. On top of that, you don't have to lug around bottled water anymore and you save money.

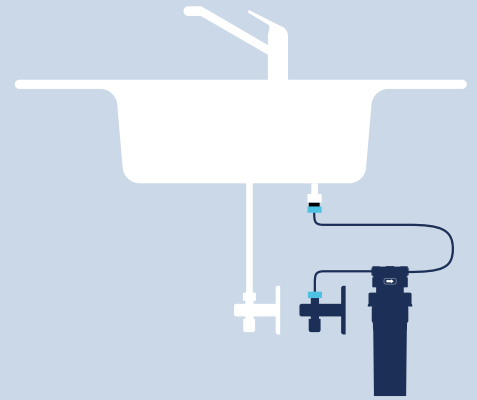

Silver Cartridge

The Silver Cartridge has an activated carbon block filter used for dechlorination and purification of Drinking Water. The filtration reduces and removes chlorine content, organic compounds, odours and off-tastes from your tap water. In addition to the activated carbon block filter, SILVER ion technology is used to give bacteriostatic action to the filter. The filter needs to be replaced at least once a year, depending on its capacity.

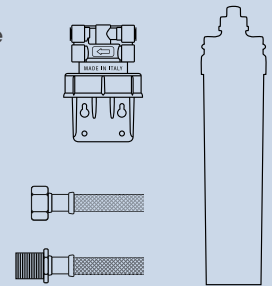

- Improves the taste and odour of your Drinking Water
- Dechlorination and purification of Drinking Water
- Reduces water turbidity
- Reduction of microplastics
- Prevents bacterial growth
- 0,5 micron filter

Installation

This kit includes:
