DRINKING WATER
PURIFICATION

Elvion Silver

Piece of mind
in *every drop*

Tap water as your source of drinking water is a simple way to reduce your ecological footprint. A filter cartridge improves the quality of your water and saves you a lot of plastic waste. A simple, efficient and tasty solution that is good for the environment and your wallet.

Advantages

Removes unpleasant tastes and odours

Elvion Silver water filters remove unpleasant tastes and odours from tap water, turning every tap into a natural source of pure drinking water. What's more, filtered water allows you to enjoy the full flavour and aroma of coffee, tea and other water-based beverages even more intensely.

Environmentally friendly

Water filters are an environmentally friendly and healthy alternative to bottled water. By installing this filter at home, you prevent thousands of plastic bottles from ending up as waste and help reduce greenhouse gas emissions.

Optimal return

The filters combine an attractive and stylish design with optimal performance. The filters are installed with virtually no pressure loss. This ensures that you always have sufficient tap water flow.

User-friendly

You can install the filters on an existing kitchen tap. What's more, you only need to replace the filter once a year. Difficult? Not at all. The filters can be replaced in no time at all.
