# Elvion Natura

## Protect your home against *limescale*

The Elvion Natura is an all-in-one device. It has small dimensions, but delivers great performances. Thanks to easy installation, you are quickly up and running. The softener is non-electrical operated and reduces your salt & water consumption drastically.

Non-electric softeners

Soft water 24/7

Up to 50% less salt and 60% less water

High flow rates

### Technical specifications

Bypass	3/4"
Working Pressure	1 - 8 bar*
Flow Rate (at 1 bar)	max. 1500 l/h
Exchange Capacity	150m <sup>3</sup> / ppm CaCO <sub>3</sub>
Water Usage / Regeneration	18 L
Salt Usage / Regeneration	0.3 kg
Regeneration Time	15 min.
Max. Temperature	40°C
Filterscreen	80µm

### The principle

The Elvion Natura functions only by the hydraulic pressure on the incoming water. The moving parts are brought into movement by a dynamic pressure starting from 0.8 bar. The appliances have no motors non-electric wires. They simply don't need them. The Elvion Natura is smaller than a conventional water softener and uses up to 50% less salt and up to 60% less water during regeneration.

### Dimensions (in mm)
