

- Multifunction lithium-ion 12V/24V starter (4500 A max 12V start) for motorbikes, cars, campers, vans, boats and commercial vehicles, with Override function for starting even without a battery.
- Advanced safety thanks to integrated protections against short circuits, reverse polarity and incorrect voltage selection.
- High-efficiency powerbank with USB-C Power Delivery and Quick Charge, for fast charging of smartphones, tablets, cameras and other electronic devices.
- Multifunctional two-colour LED lighting with 6 operating modes, including steady light with different intensities, strobe and SOS, for maximum visibility in any situation.
- Compact, robust and practical design with a durable frame and carrying handle, ideal for intensive use.

DESCRIPTION

Multifunctional 12V/24V lithium starter for motorbikes, cars, campers, vans, boats and commercial vehicles. Compact, light and versatile, it guarantees high performance in any emergency situation, even without battery, thanks to the Override function. Powerbank for smart and fast charging of electronic devices via USB C with Power Delivery and Quick Charge. Equipped with a high-intensity LED light in 2 colours, it becomes a light source in case of need. The integrated protections (against short circuit, reverse polarity, wrong voltage selection, etc.) make it safe to use.

FEATURES:

- 12V/24V emergency starter for a wide range of vehicles, from light to commercial vehicles;
- Override function for starting even with a completely discharged or absent battery;
- Integrated protections for maximum safety of use (against short circuit; against polarity reversal; wrong voltage selection);
- Powerbank with USB-C output with Power Delivery and Quick Charge for fast and efficient charging of electronic devices (smartphones, tablets, cameras, etc.);
- Powerful light source with two-colour high-intensity LED light and 6 operating modes (steady at various intensities, strobe, SOS);
- High-efficiency LiPo lithium battery with fast charging and long life;
- robust and durable structure designed for intensive use;
- Practical carrying handle.

Equipped with USB-C charging cable.
