

BERG GO-KARTS

Age groups and child-height guide

Use height as well as age when choosing a kart. The ranges below are BERG's published recommendations; a child should be able to reach the pedals and controls comfortably.

Range	Typical age	Recommended height	Key features / best suited for
GO / GO²	10 months–2½ years	70–100 cm	First ride-on for toddlers; compact and simple. GO ² is a ride-on rather than a standard pedal kart.
Buzzy	2 years+	85–115 cm	First pedal go-kart; light direct-drive pedalling, puncture-proof EVA tyres and adjustable seat.
Reppy	2½ years+	95–125 cm	Low bucket seat, adjustable seat and sporty compact design; EVA tyres on many models.
Buddy	3–8 years	100–130 cm	Adjustable seat, pneumatic tyres and BFR system for braking and reversing after stopping.
Rally	4–12 years	110–150 cm	Larger kart for growing children; pneumatic tyres and BFR braking/reverse system.
XL frame	5 years+	125–190 cm	Large frame for older children, teenagers and many adults; drive options vary by model.
XXL frame	5 years+	125–210 cm	Extra-large frame for taller riders and adults.
Street-X	6–12 years	125–170 cm	A more specialised sporty/trike-style model; check the exact version's specifications.
Electric XL / E-BFR	Model-dependent; often 6+	Check exact model	Electric-assist versions; age, height and weight limits differ by model.

Quick guide

- **Toddlers:** GO / GO² or Buzzy, depending on whether they are ready to pedal.
- **Preschool:** Buzzy or Reppy; Buddy may suit a taller child from around 100 cm.
- **Older/taller children:** Rally from around 110 cm; XL/XXL from around 125 cm.
- **Best fit check:** the child should reach the pedals without stretching and steer and brake confidently.

Important notes

Age and height ranges can vary by model and version. Always check the exact model's current manual for weight limits and other specifications. Adult supervision and suitable riding surfaces are recommended.
