WELCOME TO STAKELUMS HIRE GUIDE

Established in Borrisoleigh, Co. Tipperary in 1960, the Stakelum family have managed to grow the business from humble beginnings into one of the largest independent Home & Hardware stores in Ireland. Stakelums 90,000 sq. ft award-winning superstore offers customers the opportunity to browse thousands of quality products from trusted brands, all under one roof.

We pride ourselves on giving our customers the best shopping experience possible and our friendly staff are always on hand to offer advice and information. If you have a question or want to get a quote, then please get in touch.

As you will see from our hire guide, we offer a wide range of equipment for hire and sale. Our team in the hire center has over 25 years of experience of the tool hire trade and we therefore fully understand the needs of our customers.

Safety is a priority for us, and you can be sure that everything that you hire from us will be well maintained and ready to use.

Whether you've been working with us for a while or are a first-time customer our friendly and knowledgeable hire team at Racecourse Road look forward to seeing you soon.

HEALTH & SAFETY

Safety at Heights

When working on towers follow these safety tips:

System Scaffold Towers

- System scaffold towers must be constructed to the same standard as any other scaffolding.
- Construct system scaffold towers to the same standards as other scaffolding.
- Inspect system scaffold towers before use.
- Only trained individuals should erect system scaffold towers.
- Fully board working platforms and add guardrails and toe boards if necessary.
- Brace system scaffold towers for stability.

Mobile Towers

- Mobile towers must not be used unless wheels with brakes are provided.
- Use mobile towers with working brakes and secure wheels.
- Limit mobile tower height to three times the smaller base dimension outdoors (3.5 times indoors).
- Ensure secure access to the tower, such as with firmly fixed ladders.
- Avoid moving mobile towers with personnel or materials on the platform.
- Handle tower assembly and disassembly carefully to prevent component damage.
- Report any unsafe towers to your supervisor.
- Follow the manufacturer's guide for erecting and dismantling mobile access towers.

NEVER USE LADDERS / STEPS / CRATES TO GAIN EXTRA HEIGHTS.

HEALTH & SAFETY

Power Tools

Proper training, maintenance, and supervision are essential for safe power tool use.

- Turn off and wait for exposed cutters to stop before setting down tools.
- Avoid loose clothing near moving power tool parts.
- Inspect air lines before using air-driven tools.
- Operate machinery with guards in place.

Dust

Cutting paving slabs, kerbstones, or other concrete or stone products generates a significant amount of dust. This dust contains extremely fine particles known as Respirable Crystalline Silica (RCS). Exposure to RCS dust can lead to serious health problems, some of which can be fatal. To prevent this, follow these precautions:

Employ wet methods: Use portable pressurized bottle systems on cut-off saws to suppress dust production.

Wear breathing masks: Equip yourself with appropriate breathing masks to filter out RCS particles from the air you breathe.

Health & Safety Equipment

We keep in stock a full range of site safety and personal protective equipment.

ACCESS EQUIPMENT

Single Width Access Tower

The single-width access tower is specifically designed for small and confined spaces. It features:
