PRODUCT OVERVIEW

The DEWALT 50L 2.5hp 230V Oil-Free Vertical Direct Drive Compressor is a robust and versatile direct-driven air compressor perfect for providing dependable compressed air that meets the demands of use in automotive detailing, intermittent spraying and finishing, inflation, cleaning, blow-off and light-to-medium multi-tool use.

With a reliable 9.1CFM output and a twin-cylinder motor that offers quieter and smoother performance than single-cylinder models, it provides consistently high performance whatever the task. A space-saving vertical design, complete with angled pull handle and anti-vibration feet for mobility, offers both durability and flexibility in tighter spaces.

ADVANTAGES

DIRECT DRIVE TRANSMISSION FOR CONSISTENT OUTPUT IN DEMANDING TASKS

- Delivers positive transmission drive for proven, reliable and efficient everyday use.
- Robust 2.5hp (1.8kW) twin-cylinder 2850rpm brushless induction motor enables the compressor to meet performance capabilities, while offering significantly quieter, smoother operation than brushed alternatives perfect for precision tasks.

OIL-FREE OPERATION FOR LOW MAINTENANCE USE & HIGHER QUALITY AIR

- This ensures no oil carry-through for cleaner air to tools and equipment, and offers easier movement compared to oil-lubricated models with more potential to spill.
- No oil contamination ensures clean air perfect for paint, finishing and detailing.

SPACE-SAVING DESIGN TAKES LESS SPACE THAN TRADITIONAL COMPRESSORS

- Upright design offers a small footprint than horizontal models, making it ideal for areas with restricted floor space and busy workshop environments.
- A larger 50L tank ensures smoother airflow and fewer restarts.

BUILT-IN TANK PRESSURE & WORKING PRESSURE GAUGES OPTIMISE AIR DELIVERY

- Panel with tank and working pressure gauges for accurate display and enhanced use.
- Fitted Euro quick-release connector for faster, safer tool and equipment changeovers.
- Air receiver ball valve allows maximum airflow direct from the receiver.

EXTRA-LARGE WHEELS, SWIVEL CASTORS & U-HANDLE FOR INCREASED MOBILITY

- Allows full movement in a variety of work area settings for added flexibility.
- Double anti-vibration feet help lessen vibration in use and reduce operating levels.
